(54) Title: **CHILD SEAT**

(57) **Abstract:** A child seat (1) for use in a ve-
hicle is designed to be placed on a vehicle seat.
The child seat (1) comprises a seat part (2) and
an upright part (3). The upright part (3) com-
prises a backrest part (10) that is adjustable in
height relative to the seat part (2) and a head-
rest part (6) that is adjustable in height relative
to the seat part (2) and the adjustable backrest
part (10). The headrest (6) and the adjustable
backrest part (10) are connected to each other,
so that a height adjustment of the headrest (6)
leads to a different, preferably smaller height
adjustment of the adjustable backrest part (10).
